MrMapper

MrMapper Frequently Asked Questions (FAQs)

Q: How do I use MrMapper?

A: A manual on how to use the main functionality of the applications can be found here. Additionally, you can click on the following links to user manuals for previous versions 2.0 and 1.3.

Q: What are the types of applications that may be able to help my community make better informed decisions?

A: Common applications for communities may include, ***but are not limited to***:

- All departments – Understanding and viewing spatial relationships to department-specific data in relation to assessor's parcel data and aerial imagery
- Assessor's – Managing parcel data to perform pre-defined or custom tasks such as generating abutter's lists or printing area maps
- Assessor's – Site viewing/analysis with current aerial imagery
- Building – Permit tracking and site viewing/analysis
- DPW – Reviewing and updating accuracy of road data in relation to Ch. 90 funding
- DPW – Asset management
- Fire – Hydrant Mapping and project Pre-Planning
- Planning – Access to dozens of data sets essential to the planning process such as zoning, land use and open space data, areas of environmental resources or sensitivity, demographic and socio-economic data or elevation/topography
- Police –Crime Mapping and project Pre-Planning
- Public Safety/Emergency Management– Access to current, accurate address and Critical Infrastructure data

Q: How can I request that my data or a specific tool or function be available on MrMapper?

A: Contact Jason Stanton, GIS Director, at 978-345-7376 x313 or jstanton@mrpc.org.
